

Food Access and Chronic Disease Across U.S. Counties

Dashboard uses Excel, SQL, and Python to connect food-access barriers with obesity, diabetes, and coronary heart disease prevalence

17.3%

Population below poverty
75th-pct cutoff

7.1%

No-vehicle households
75th-pct cutoff

404

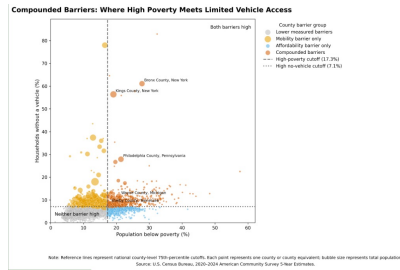

Compounded-barrier
counties

3,144

Counties analyzed

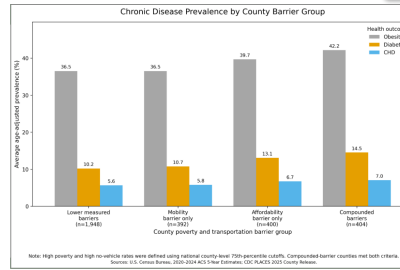

Compounded barriers: poverty + limited vehicle access

Python

Chronic disease by barrier group

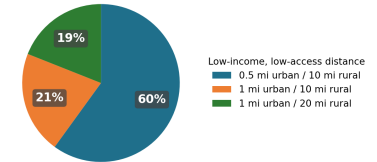

Python

USDA food-access by distance

Excel

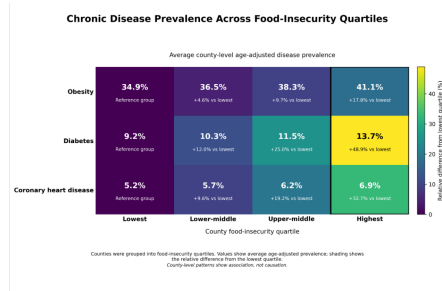

USDA Food Access Context, 2019

Share of low-income, low-access population by distance category

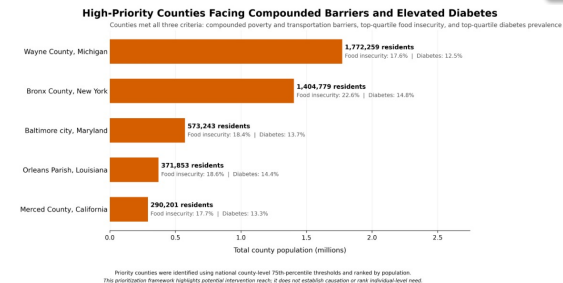

Disease prevalence across food-insecurity quartiles

SQL + Python

High-priority counties by population reach

SQL + Python
